dog-20261014 production report

Generation audit for the 20-minute Tart and Tine movie. Project revision 57.

Final movie video filename

`dog-20261014-480p.mp4`

Movie file location: C:\Users\Admin 3\Downloads\codex-movie\movies\dog-20261014\exports\dog-20261014-480p.mp4

Clip paths below are relative to the movie project folder: C:\Users\Admin 3\Downloads\codex-movie\movies\dog-20261014

Production	Result
Planned segments / screenplay scenes	**70 / 16**
Total API requests / accepted tasks	**96 / 94**
Successful returned videos	**91**
Selected / superseded video sources	**70 / 21**
Failed after acceptance / rejected	**3 / 2**
Final timeline duration	**20:00 (1,200 seconds)**
Total successful output duration	**26:04 (1,564 nominal seconds)**

Generation and cost	Result
Model	**Dreamina Seedance 2.5**
Model identifier	**dreamina-seedance-2-5-260628**
Native resolution / format	**480p, 854x480, 16:9, 24 fps**
Duration per segment	**8-24 seconds**
Returned completion tokens	**15,062,518**
Estimated Seedance cost (USD)	**US$161.1689426**
Estimated Seedance cost (HKD)	**HK$1,264.69**

Requests used through final selection

Requests per segment	1	2	3	4
Number of segments	51	14	3	2

68 segments returned a video on request 1. s04_c06 first returned a video on request 2; s12_c02 first returned one on request 4. Later successful takes could still replace earlier videos after quality review.

The cost includes HK$294.33 for 21 superseded successful videos. Five failed or rejected requests are estimated at zero under the provider billing policy. Account invoices, discounts, tax and card FX fees were not available.

All 70 planned segments

Every row uses Dreamina Seedance 2.5 at native 480p (854x480), 16:9 and 24 fps. Duration is the timeline / nominal duration for one take. Costs include all successful takes for that segment.

First video = request number returning the first successful video. Failed / rejected shows those two counts separately. Selected video filenames are unique paths relative to the movie project folder printed on page 1.

Segment	Description	Sec.	All requests	Videos	Failed / rejected	First video	Selected video filename / path	Est. HKD
s01_c01	Bench puzzle and Tine's stuck-bottom gag	16	1	1	0 / 0	1	chapters/s01_c01/takes/take_01.mp4	HK$12.94

s16_c08	Offer room, settle into puppy pose; live harbour and brief fade	24	1	1	0 / 0	1	`chapters/s16_c08/takes/take_01.mp4`	HK$19.39
TOTAL	70 segments	1,200	96	91	3 / 2			**HK$1,264.69**

Row costs are rounded to cents. The total uses unrounded amounts. take_01_crop02.mp4 and take_02_mix01.mp4 are local edits of existing generated sources, with no additional Seedance generation fee.

All 96 generation requests and video filenames

Each successful request has its actual video filename and project-relative path. Failed / rejected requests did not return a video file. Use identifies the source selected for the final movie; selected local edits are listed after this log.

Duration is the requested nominal generation duration. MP4 container durations can include a small audio or frame padding difference. Requests are grouped in segment order, matching the spreadsheet audit.

Cost method, local edits and evidence

Estimated USD = returned completion_tokens x US$10.70 / 1,000,000. Estimated HKD = USD x 7.847. The FX observation is dated 15 October 2026, checked on 16 October 2026. All generation requests used image references, with zero reference-video input.

Selected video sources: US$123.66 / HK$970.36. Superseded successful videos: US$37.51 / HK$294.33. Local assembly and conventional edits add no Seedance generation cost.

These are list-price estimates derived from recorded provider usage. They exclude image generation, Codex subscription costs, account discounts or credits, taxes and card exchange fees. There are no unresolved charge attempts in the ledger.

Selected local edits and source filenames

Segment	Selected video file	Generated source file	Additional Seedance cost
s09_c01	chapters/s09_c01/takes/take_01_crop02.mp4	chapters/s09_c01/takes/take_01.mp4	HK$0.00
s13_c01	chapters/s13_c01/takes/take_02_mix01.mp4	chapters/s13_c01/takes/take_02.mp4	HK$0.00

s09_c01 uses a local crop to remove a duplicate child. s13_c01 uses a local ambience replacement with existing project audio. An unused crop trial and assembly trial are not new Seedance generations.

Failed and rejected requests

Segment	Take	Result	Provider error code	Est. HKD
s02_c03	take_03	failed	OutputAudioSensitiveContentDetected.PolicyViolation	HK$0.00
s04_c06	take_01	rejected	InputImageSensitiveContentDetected.PrivacyInformation	HK$0.00
s12_c02	take_01	rejected	InputImageSensitiveContentDetected.PrivacyInformation	HK$0.00
s12_c02	take_02	failed	OutputVideoSensitiveContentDetected.PolicyViolation	HK$0.00
s12_c02	take_03	failed	OutputVideoSensitiveContentDetected.PolicyViolation	HK$0.00

YCharts ECB-derived USD/HKD observation for 15 October 2026: https://ycharts.com/indicators/us_dollar_to_hong_kong_dollar_exchange_rate

Project evidence: revision 57, usage.json, exports/task-journal.json including all prior takes, assembly settings, selected local-edit records and exports/verification.json. All 96 attempt IDs match between the ledger and journal. All 91 generated files and all 70 selected clip files exist.

Final movie verification: dog-20261014-480p.mp4 has 28,800 video frames at 24 fps, giving an exact 1,200-second video timeline. The MP4 container is 1,200.02 seconds, with stereo AAC audio at 48 kHz. These are the recorded production verification results.

Production session: 14 October 2026 19:32:52 to 15 October 2026 14:45:23 Hong Kong time. Elapsed time was 19:12:31, including preparation, queues, reviews and approval waits. It is not model processing time.
