MIDNIGHT PHANTOM

Production and cost breakdown

Cuphead-style project, recast with original characters | All attempts and replacements included

13
planned segments

150s
review-cut duration

43 / 57
videos / API attempts

HK$962.35
standard-rate usage cost

Model: Dreamina Seedance 2.5 - dreamina-seedance-2-5-260628

All requests: 720p, 21:9. Export: 1470 x 630, 30 fps, stereo AAC. Each segment first rendered on attempt 2.

#	Segment	Target	Attempts	Generated	Failed	Cost HKD
1	Thunder at the museum	12s	5	4	1	92.05
2	Five minutes	14s	3	2	1	51.18
3	The alley ambush	10s	4	3	1	58.45
4	Birdbrain chase	12s	4	3	1	70.10
5	The shortcut	11s	3	2	1	40.25
6	Special delivery	10s	4	3	1	58.45
7	The midnight machine	14s	6	5	1	132.93
8	Tactical falling	13s	5	4	1	99.69
9	Behind the curtain	12s	5	3	2	70.10
10	Detective special delivery	14s	4	3	1	81.75
11	The catch	11s	5	4	1	88.30
12	Worlds greatest detective	8s	4	3	1	46.80
13	Only the first test	9s	5	4	1	72.29
	TOTAL	**150s**	**57**	**43**	**14**	**962.35**

Generated means the API returned a successful video, not that every visual correction passed review. The first 13 failures were copyright rejections; segment 9 had one further failed edit. Later successful takes include alternatives and continuity revisions.

Costs are calculated from recorded completion tokens: US$122.6344319 total, converted to HK$962.35. This is standard-rate usage cost, not an account invoice; credits, discounts, tax, card FX fees, image generation and Codex usage are excluded. Row rounding can differ from the total by HK$0.01.

MIDNIGHT PHANTOM

Video filenames and selected segments

Exact source paths and assembly filenames for the current review cut

Main exported video

`midnight-phantom-review-cut-v02-150s-720p-21x9.mp4`

`Folder: C:/Users/Admin 3/Downloads/codex-movie/movies/midnight-phantom-original/exports/`

Status: review candidate with known scale and tower-position gaps; original export is preserved.

#	Film time	Generated source video (relative path)	Assembly clip filename
1	00:00-00:12	`chapters/chapter_01/takes/take_03.mp4`	`chapter_01-take_03.mp4`
2	00:12-00:26	`chapters/chapter_02/takes/take_02.mp4`	`chapter_02-take_02.mp4`
3	00:26-00:36	`chapters/chapter_03/takes/take_03.mp4`	`chapter_03-take_03.mp4`
4	00:36-00:48	`chapters/chapter_04/takes/take_03.mp4`	`chapter_04-take_03.mp4`

11	02:02-02:13	`chapters/chapter_11/takes/take_03.mp4`	`chapter_11-take_03.mp4`
12	02:13-02:21	`chapters/chapter_12/takes/take_02.mp4`	`chapter_12-take_02-crow-dark.mp4`
13	02:21-02:30	`chapters/chapter_13/takes/take_04.mp4`	`chapter_13-take_04.mp4`

Source paths above are relative to the project folder: C:/Users/Admin 3/Downloads/codex-movie/movies/midnight-phantom-original/. Assembly clips are in exports/normalized-review-v02/, except segments 6 and 12, which are in exports/normalized-v02/.

Segment 6 uses a corrected clock tail. Segment 12 uses the eye-darkened clip. Other assembly clips are normalized copies of their listed sources. These local editorial operations do not add a Seedance generation charge.

`Earlier export: midnight-phantom-150s-720p-21x9.mp4 (same exports folder)`

Duration is the requested segment length; raw generated clips can differ by a fraction of a second. The assembly trims to the exact 150-second film. Successful takes total 498 requested seconds. Edits also incur token usage for their input video.

The ledger includes every successful alternative and edit, whether selected or unused. The 14 failed requests produced no generated file and carry no Seedance charge. Detailed billing method and sources follow on page 5.

Billing method and sources

Calculation basis, production stages and interpretation of success

Production stage	Generated videos	USD	HKD
Initial production	14	37.76	296.31
Continuity regenerations	16	44.51	349.32
Video edits	13	40.36	316.72
TOTAL	**43**	**122.63**	**962.35**

Calculation: recorded completion_tokens x USD rate per million / 1,000,000. Each task is calculated before rounding; USD amounts are then converted at 7.8473 HKD per USD. Rates: US$10.70 per million tokens without video input; US$6.40 with video input. These rates apply to 720p Seedance 2.5. The successful tasks consumed 13,995,483 completion tokens in total.

Success means the provider returned a video. It does not certify visual continuity or creative acceptance. Every segment first generated successfully on API attempt 2, after its original Cuphead-based request failed. The additional failed edit in segment 9 was rejected because the requested edit was classified as an extension. The final deliverable remains a review candidate with documented continuity gaps.

Scope: all tasks recorded in movies/midnight-phantom/project.json and movies/midnight-phantom-original/project.json, including unused alternatives and subsequent edits. The live task IDs match the saved cost audit. Model identity comes from the saved endpoint-resolution record; the exported video profile comes from the saved verification record.

Local records checked: exports/seedance-cost-audit.json; exports/review-cut-v02-assembly.json; exports/endpoint-resolution.json; exports/review-cut-v02-verification.json. Paths are relative to the original-character project folder unless stated otherwise.

This is a list-price usage calculation, not an invoice or proof of the amount charged to a payment card. It excludes account credits, discounts, taxes, card FX fees, image generation and Codex usage. Local assembly does not incur a new Seedance generation charge. The FX reference is dated 16 October 2026, rather than the payment settlement date.
